

Increasing Competitiveness by Streamlining Sophisticated Shipping Operations

An integrated solution that streamlines bulk operations and management processes while enabling prompt visibility of sales performance and profitability.

At a Glance

OPUS Bulk is a comprehensive solution that caters to the full spectrum of bulk shipping, starting from planning and budgeting, actual chartering contract & fixtures, covering bulk operations and bunker management, supporting full accounting processing of revenue invoicing and expenses management. Its suite of performance reporting features enables timely analysis and facilitates optimal decision making.

Automated process such as email parsing and integration to Vessel Reporting System (VRS) improves productivity by eliminating manual data entry and increasing data accuracy - resulting in vital performance enhancements.

Suited for bulk companies of any size, supporting both dry and liquid bulk, OPUS Bulk is the ideal solution to increase operational efficiency and maximize profits.

Key Benefits:

- ✓ Incorporates global standards and best practises of bulk shipping
- ✓ Enhances data and informational precision and reliability
- ✓ Reduces operational cost with accurate forecasting and budgeting
- ✓ Improves business agility with simulations and forecasting
- ✓ Maximizes business efficiency with real-time information

Who We Are

CyberLogitec empowers the world's supply chain with advanced technologies that solve operational challenges and meet the exacting demand of our industry.

From maritime shipping operations, port and terminal operating systems to logistics forwarding and warehouse management, our integrated solutions help your business respond swiftly to changing operational needs. Our technology's advanced algorithms digitize and automate data exchange to improve efficiency, competitiveness, productivity, and service, no matter which part of the global supply you operate within.

We provide a global service desk, so you are assured of 24x7 customer support throughout the year. Headquartered in Seoul, with subsidiaries in the China, Europe, US and Vietnam, and a global sales and marketing team in Singapore, you can reach us easily no matter your geographic base.

Our mission is to provide our customers with a digital foundation to achieve new heights of operational efficiency, offer exceptional customer support, and gain a competitive advantage for a positive impact on profitability.

To gain a competitive advantage and improve profitability, bulk shipping operators need to digitalize their processes and raise their operational efficiency while improving communications with their vessels, establishing robust revenue management & cost control, and maximizing their business performance.

OPUS Bulk is the perfect solution for such business transformation by instilling efficient planning in this highly competitive and volatile market.

What You Need:

- ✓ A fast and accurate system that provides real-time analysis to support decision making
- ✓ The ability to create a detailed voyage estimation based on business type
- ✓ A reliable solution that eases the monitoring and planning process
- ✓ Automated generation of voyage analysis base on the data gathered from each step
- ✓ A Vessel Report System (VRS) that simplifies reporting with automatic data transfer
- ✓ Customizable and real-time performance report

How OPUS Bulk adds value to your business

Improves productivity

Streamlines communications between key stakeholders like shipbrokers and agents, reducing time wasted on manual consolidation of bunker expenditures, operations, and port-related matters.

Enhances accuracy and reliability

OPUS Bulk features intelligent processing to eliminate user errors, and the advanced system ensures zero calculation mistakes. It provides reliable interface processing and seamlessly integrates with the legacy system.

Precise and real-time information

Ability to generate various analysis in real-time maximizes business efficiency and helps business owners make better decisions.

Facilitates revenue forecasting

Budgeting and estimation capabilities enable timely analysis of profitability.

Enforces data integrity

Management of all bulk and voyage contracts and fixtures can be centralized by incorporating electronic approval process.

Eliminates manual tasks

The Agent Portal System (APS) allows for communication and settlement of port and bunker charges, reducing manual jobs and improving operations.
